

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Recently retired, after spending several years working with his brother to build their crane business into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast marketplace for a product that could quickly and securely elevate people in the air to accomplish maintenance and other building services.

Following their return from vacation, John set up a joint venture with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design elements of that original lift into current designs.

JLG forklifts have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the company proudly continues to expand itself into many marketplaces worldwide and develops new products to make certain consumers are capable of being more effective and perform in the workplace within a safer environment.
